

Identification grape cultivars in west-Azarbayejan

A. Alizadeh

West Azarbayjan Agriculture Research Center, Urmia.

Primary information at the begining of study were collected from local gardeners. Then, using I.B.G.R descibtor , 21 qualitative and quantitative characteristics of different organs of grapevine were studied in four periods (pre-blooming , blooming , berry formation and ripening time).

In this research, characteristics of 58 cultivars, were determined and it is found, all of these cultivars belong to *Vitis Vinifera* species.
