## **Cultivating, keeping and harvesting in new gardening**

**A. Attar**

**Dept. Of Horticulture, Khorasan Agriculture Research Center, Mashad.**

Surprising progresses in gardening and intensive cultivation of fruit trees (special apple and pear trees) in last decade has caused to horticulturists use thses methods for establishing new orchards oboundantly. Nowaday, intensive or semi-intensive plantations causes to facility keeping processes of fruit trees orchards, and decreases costs. In this poster, some of cultivating, keeping and harvesting ,machineries in modern and intensive orchards will be displayed.
