

The methods of preventing horticultural products losses and post harvest physiology problems

S.M. Hosseini-nia

Tropical and Sub tropical Fruits Affairs, Deputy of Horticulture, Tehran.

In this paper, a summary of effective factors which affected on increasing or decreasing horticultural losses are explained as follows:

A. Effective factors in increasing losses

- 1- Shortage of processing factories.
- 2- Laek of methodical cool and store rooms.
- 3- Laek of marketing systems.
- 4- Lack of packaging and sorting factories.

B. Effective factors in decreasing losses.

1. To establish processing , packaging and sorting factories.
2. To establish technical cool and store rooms in production regions.
3. To market products in and out of country.
4. To establish research and study centers.
