1- Guilan Pests and Diseases Research Institute, Rasht.

2- Dept. of Pests and Diseases Research, Pest and Diseases Research Institute , Tehran.

Green and blue mould caused *Penicillium digitatum* and *P.italicum*. That are the most important disease of orange fruis in storage, Tecto, Bavistin, Captan and un-treated fuit waxy paper(wrapping) were conducted for two years. The results have been shown by analysis of variance that Bavistin+waxy paper , Tecto+ waxy paper and wrapping paper only are more effective than other treatments for diseases control.
