

Citrus cultivation in Darab city

F. Ahmadloo

Darab Agriculture management, Darab.

Citrus cultivation areas in Darab are divided to three regions: Farsarood, city sides and Ghariatol-Khair

Orange cultivars, in this city, are local citrus, Navel, Valensia and Maghz Khoon, and Mandrina cultivars which are Clemantin, local and Kino. Another citrus in this city are, sweet and sour limes, grape fruit and etc. 70% to 80% of citrus orchards are irrigated by trickle and another by flooding irrigation. In this paper, pests and diseases, harvesting, packaging and saling methods and another subjects of citrus production in Darab city are explained.
